Vector battery charger and maintainer

© 1996-2014, Amazon.com, Inc. or its affiliates Algo salió mal. Por favor, vuelve a intentarlo. 6V / 12V AUTOMATICBATTERY CHARGERINSTRUCTION MANUALBM315VSAVE THIS INSTRUCTION MANUAL FOR FUTURE REFERENCE. © 2020 Baccus Global LLCBoca Raton, FL 33432(877) 571-2391BCThis device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:• Reorient or relocate the receiving antenna. • Increase the separation between equipment and receiver. • Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. • Consult the dealer or an experienced radio/TV technician for help.Changes or modifications not approved by the party responsible for compliance could void user's authority to operate the equipment.SAFETY GUIDELINES / DEFINITIONSDANGER: Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.WARNING: Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.CAUTION: Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury.CAUTION: Used without the safety alert symbol indicates potentially hazardous situation which, if not avoided, may result in property damage.RISK OF UNSAFE OPERATION: When using tools or equipment, basic safety precautions should always be followed to reduce the risk of personal injury. Improper operation, maintenance or modification of tools or equipment could result in serious injury and property damage. There are certain applications for which tools and equipment are designed. Manufacturer strongly recommends that this product NOT be modified and/or used for any application other than for which it was designed. Read and understand all warnings and operating instructions before using any tool or equipment.READ ALL INSTRUCTIONSWARNING: Read and understand this instruction manual before using this unit. Failure to follow all instructions listed below may result in electric shock, fire and/or serious injury.IMPORTANT SAFETY INSTRUCTIONSGENERAL SAFETY WARNINGS AND INSTRUCTIONS • This unit was designed for household use only. • Avoid dangerous environments: don't use the charger in damp or wet locations. Don't use charger in the rain. • Keep children away. All visitors should be kept at a distance from work area. • Store indoors. When not in use, the battery charger should be stored indoors in dry, and high or locked-up place — away from reach of children. • Do not operate near flammable liquids or in gaseous or explosive atmospheres. Sparks might ignite fumes. • Unplug the battery charger when not in use.DANGER: Never alter AC cord or plug provided; if it will not fit outlet, have proper outlet installed by a qualified electrician. Improper connection can result in a risk of an electric shock.SPECIFIC SAFETY INSTRUCTIONS FOR POWER CORDS • Don't abuse cord. Never carry appliance by cord or yank it to disconnect from receptacle. Keep cord from heat, oil, and sharp edges. Pull by plug rather than cord when unplugging the unit. • Ground Fault Circuit Interrupter (GFCI) protection should be provided on the circuits or outlets to be used. Receptacles are available having built in GFCI protection and may be used for this measure of safety.Extension cords• An extension cord should not be used unless absolutely necessary. Use of improper extension cord could result in a risk of fire and electric shock. If an extension cord is used, make sure that the pins of the extension cord are the same number, size and shape as those in the charger. • Make sure your extension cord is in good condition. When using an extension cord, be sure to use one heavy enough to carry the current your product will draw. An undersized cord will cause a drop in line voltage resulting in loss of power and overheating. The following table shows the correct size to use depending on cord length and nameplate ampere rating. If in doubt, use the next heavier gauge. The smaller the gauge number, the heavier the cord.Recommended Minimum AWG Size for Extension Cords for Battery Chargers AC Input Rating American Wire Gauge (AWG) Size of Cord Amperes Length of Cord, feet (m) Equal to or But less25 (7.6) 50 (15.2) 100 (30.5) 150 (45.6) greater than 0 2 18 18 18 16 2 3 18 18 16 14 3 4 18 18 16 14 4 5 18 18 14 12 5 6 18 16 14 12 6 8 18 16 12 10 8 10 18 14 12 10 10 12 16 14 10 8 12 14 16 12 10 8 14 16 16 12 10 8 16 12 10 8 16 18 14 12 8 8 18 20 14 12 8 6Power Cord Safety: This appliance has a polarized plug (one blade is wider than the other) as a safety feature. This plug will fit into a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.WARNING - Shock hazard: • If an extension cord is used, make sure that:a) the pins of extension cord are the same number, size and shape as those in the charger,b) the extension cord is properly wired and in good electrical condition,c) the wire size is large enough for the AC rating of the charger as indicated in the table in the previous section.SPECIFIC SAFETY INSTRUCTIONS FOR BATTERY CHARGERS • Use of accessories and attachments: The use of any accessory or attachment not recommended by manufacturer for use with this battery charger could be hazardous. • Stay alert. Use common sense. Do not operate this equipment when you are tired or impaired. • Check for damaged parts. A part that is damaged should be properly repaired or replaced by manufacturer before further use unless otherwise indicated elsewhere in this instruction manual. • Do not operate the battery charger if it has received a sharp blow, been dropped, or has been otherwise damaged in any way. Return it to the manufacturer for repair. • THIS UNIT IS NOT FOR USE BY CHILDREN AND SHOULD ONLY BE OPERATED BY ADULTS.WARNING - Burst hazard: • Do not use the unit for charging dry-cell batteries that are commonly used with home appliances. These batteries may burst and cause injury to persons and damage property. Use the unit for charging a LEAD-ACID battery only. It is not intended to supply power to a low-voltage electrical system other than in a starter-motor application. • Never attempt to charge non-rechargeable batteries.WARNING - Risk of explosive gases. • WORKING IN THE VICINITY OF A LEAD ACID BATTERY IS DANGEROUS. BATTERIES GENERATE EXPLOSIVE GASES DURING NORMAL BATTERY OPERATION. FOR THIS REASON, IT IS OF THE UTMOST IMPORTANCE THAT EACH TIME BEFORE USING THE BATTERY CHARGER YOU READ THIS MANUAL AND FOLLOW INSTRUCTIONS EXACTLY. • To reduce the risk of battery explosion, follow these instructions and those published by the battery manufacturer and manufacturer of any equipment you intend to use in the vicinity of the battery. Review cautionary markings on these products and on the engine. • This equipment employs parts (switches, relays, etc.) that produce arcs or sparks. Therefore, if used in a garage or enclosed area, the unit MUST be placed not less than 18 inches above the floor.WARNING - Shock hazard: • Do not operate unit with damaged cord or plug; or if the unit has received a sharp blow, been dropped, or otherwise damaged in any way. Do not disassemble the unit; return it to the manufacturer when service or repair is required. Opening the unit may result in a risk of electric shock or fire, and will void warranty. • Use of an attachment not supplied, recommended or sold by manufacturer specifically for use with this unit may result in a risk of electrical shock and injury to persons. • NEVER submerge this unit in water; do not expose it to rain, snow or use when wet. • To reduce risk of electric shock, disconnect the unit from any power source before attempting maintenance or cleaning. Turning off controls without disconnecting will not reduce this risk.WARNING - To reduce the risk of fire: • Do not operate near flammable materials, fumes or gases. • Do not expose to extreme heat or flames.WARNING - To reduce the risk of injury or property damage: To prevent damage to a battery or the battery charger, please make sure you select the correct voltage setting (6V or 12V) for the application.CAUTION - To reduce the risk of injury or property damage: • NEVER ATTEMPT CHARGE A FROZEN BATTERY. • This charger is not designed for use with every make, manufacture or model of engine. • Do not charge the battery while the engine is operating. • Stay clear of fan blades, belts, pulleys, and other parts that can cause injury to persons. • Never smoke or allow a spark or flame in vicinity of vehicle battery, engine or battery charger. • Remove personal metal items such as rings, bracelets, necklaces and watches when working with a lead acid battery. A lead acid battery can produce a short circuit current high enough to weld a ring, or similar metal object, to skin causing a severe burn. • Be extra cautious to avoid dropping a metal tool onto the battery. It might spark or short-circuit the battery or another electrical part, and that may cause an explosion. • Never allow battery acid to come in contact with this unit. • Do not operate this unit in a closed area or restrict ventilation in any way. • Always turn the battery charger off by unplugging it when not in use. • Do not open the battery charger — there are no user-serviceable parts inside. Opening the battery charger will void manufacturer's warranty. • Operate battery charger only as described in this Instruction Manual. • Check battery charger and components periodically for wear and tear. Return to manufacturer for replacement of worn or defective parts immediately.FIRST AID • When working with lead acid batteries, always make sure someone is close enough to provide immediate assistance in case of accident or emergency. • Always have protective eyewear when using this product: contact with battery acid may cause blindness and/or severe burns. Be aware of first aid procedures in case of accidental contact with battery acid. • SKIN: Have plenty of fresh water and soap nearby in case battery acid contacts skin. If battery acid comes in contact with skin, rinse immediately with water, then wash thoroughly with soap and water. If redness, pain, or irritation occurs, seek immediate medical attention. • EYES: If battery acid comes in contact with eyes, flush eyes immediately for a minimum of 15 minutes and seek immediate medical attention. • NEVER operate battery charger in a closed-in area or restrict ventilation in any way.6. Marine batteries must be removed and charged on shore. To charge it on board requires equipment specially designed for marine use. This unit is NOT designed for such use.7. Do not set a battery on top of battery charger.WARNING: A spark near the battery may cause an explosion. To reduce risk of a spark near the battery: Connect and disconnect DC output clamps and ring terminals only after removing AC cord from electric outlet.Connection Precautions1. Disconnect AC cord from electric outlet before connecting or disconnecting DC clamps or ring terminals.2. NEVER allow clamps or ring terminals to touch each other.Charging a battery installed in a vehicleWARNING - A spark near the battery may cause an explosion. To reduce risk of a spark near the battery:1. Position AC and clamp cords to reduce risk of damage by hood, door, or moving engine part.2. Stay clear of fan blades, belts, pulleys, and other parts that can cause injury to persons.3. Check polarity of battery posts. POSITIVE (POS, P, +) battery post usually has larger diameter than NEGATIVE (NEG, N, -) post.4. Determine which post of the battery is grounded (connected) to the chassis. If negative post is grounded to chassis (as in most vehicles), see 5. If positive post is grounded to the chassis, see 6.5. For negative-grounded vehicle, connect POSITIVE (RED) clamp from battery charger to POSITIVE (POS, P, +) ungrounded post of battery. Connect NEGATIVE (BLACK) clamp to vehicle chassis or engine block away from battery. Do not connect clip to carburetor, fuel lines, or sheet-metal body parts. Connect to heavy gauge metal part of the frame or engine block.6. For positive-grounded vehicle, connect NEGATIVE (BLACK) clamp from battery charger to NEGATIVE (NEG, N, -) ungrounded post of battery. Connect POSITIVE (RED) clamp to vehicle chassis or engine block away from battery. Do not connect clip to carburetor, fuel lines or sheet-metal body parts. Connect to a heavy gauge metal part of the frame or engine block.7. See operating instructions for length of charge information.When disconnecting charger, disconnect AC cord, remove clip from vehicle chassis, and then remove clip from battery terminal. Charging a battery that has been removed from a vehicleWARNING - A spark near the battery may cause an explosion. To reduce risk of a spark near the battery:1. Check polarity of battery posts. The Positive post (marked POS, P, +) usually has a larger diameter than the Negative battery post (marked NEG, N, -).2. Attach a 24-inch (minimum length) AWG #6 insulated battery cable to the Negative battery post (marked NEG, N, -).3. Connect the Positive (RED) battery clamp to the Positive battery post (marked POS, P, + or red).4. Stand as far back from the battery as possible, and do not face battery when making final connection.5. Carefully connect the NEGATIVE (BLACK) charger clamp to the free end of the battery cable connected to the negative terminal. Note: A marine (boat) battery must be removed and charged on shore. To charge it on board requires equipment specifically designed for marine use. This unit is NOT designed for such use.When disconnecting the charger, always do so in reverse sequence of connecting procedure and break first connection while as far away from battery as practical.SETTING UP THE UNITEnsure that all installation and operating instructions and safety precautions are understood and carefully followed by anyone installing or using the charger. Follow the steps outlined in the "Important Safety Instructions" section of this manual. Mounting InstructionsThe BM315V battery charger is designed to be able to mount on a flat surface. The unit has incorporated two mounting holes at the corners of the unit.Note: Always disconnect the charger at AC power source and at battery terminal when mounting the unit.1. Make sure the surface is flat and free of obstruction so the unit can rest flat on the surface.2. Make sure the unit is disconnected from both AC power source and the battery.3. Use 8/32 inches (6.35mm) wood screw to mount the unit through the mounting hole.4. Do not over tighten the screw, it will damage the housing.WARNING: Do not put the screw through the plastic housing as this will permanently damage the unit and cause a potential electrical hazard.OPERATING INSTRUCTIONSIMPORTANT: ALWAYS disconnect the AC power cord from the AC power outlet before connecting (or disconnecting) the charger to (or from) the battery.Connecting the Charger and Charging the Battery with the Battery ClampsThe charger battery clamps are color-coded (RED-POSITIVE and BLACK-NEGATIVE).1. Unplug the battery charger AC cord from the AC outlet.2. Disconnect the battery clamps from the unit at output cord connector.3. Connect the RED POSITIVE clamp following the instructions in the "Preparing to Charge" section.4. Connect the BLACK NEGATIVE clamp following the instructions in the "Preparing to Charge" section.5. Connect the battery clamp connector to the unit connector, as far away from the battery as possible.6. Slide the voltage selector to proper setting and plug the AC cord into the AC outlet.7. Observe the blinking GREEN LED that indicates the unit is operating.8. Leave the unit on.9. Monitor the battery from time to time.WARNING: FOLLOW THE STEPS OUTLINED IN "IMPORTANT SAFETY INSTRUCTIONS" AT THE FRONT OF THIS MANUAL TO REDUCE RISK OF A SPARK NEAR THE BATTERY.Connecting the Charger and Charging the Battery with the Terminal RingsCONNECTING THE CHARGER WITH TERMINAL RINGSThe charger crimped terminal rings are color-coded (RED- POSITIVE and BLACK-NEGATIVE). These rings connect directly to the corresponding connectors on the battery posts.NUTCONNECTORTERMINAL RINGBOLT1. Remove the nuts from the bolts of the battery post's connectors. 2. Position the RED terminal ring on the bolt of the POSITIVE battery post connector.3. Position the BLACK terminal ring on the NEGATIVE post connector; then replace the nuts.4. If there is any problem connecting the output leads, check with a reputable autosupply store or contact the Customer Service Department toll-free at 1-877-571-2391 for assistance in finding an appropriate connection device for your particular application.CHARGING WITH THE TERMINAL RINGS1. Disconnect AC power cord from AC power outlet2. Disconnect battery terminal clamps and DC accessory plug from the charger output cable, at connector.3. With the ring terminals connected and with ring terminal connector held as far away from battery, connect to the charger output cord. If the charger red LED is lit, check ring terminal connections at battery.4. Slide the voltage selector switch to 6V or 12V.5. Insert the AC plug of the battery charger into any standard 110/120 volt AC wall outlet.6. Observe the blinking GREEN LED that indicates the unit is operating.7. Leave the unit on.8. Monitor the battery from time to time.TROUBLESHOOTINGWARNING: During troubleshooting, if there is a need to connect/disconnect the unit from battery, follow the steps outlined in "Important Safety Instructions" at the front of this manual and the warning "To reduce risk of a spark near the battery".Unit not charging• Check that the charger is properly connected to a live 120 volt AC outlet (the LED will illuminate). • Check that the correct voltage setting has been selected for the battery being charged. • If the battery to be charged has fallen below 2 volts, the battery cannot be recharged with this unit. - Make sure output connection are secured. - Check correct polarity connections. - If the charger does not detect battery voltage, the unit will not run.CARE AND MAINTENANCEWith proper care and minimal maintenance, this unit will provide years of dependable service. For maximum performance, manufacturer recommends:• After each use, clean the battery charger clamps — be sure to remove any battery fluid that will cause corrosion of the clamps. • Clean the outside case of the charger with a soft cloth. • Do not allow liquid to enter the charger. Do not operate when charger is wet. • Keep the charger cords loosely coiled during storage to prevent damage to the cords.CAUTION - To reduce the risk of personal injury or property damage: • Do not use charger if cords or clamps have been damaged in any way — call Technical Support toll-free at 1-877-571-2391. • There are no user-serviceable parts in this unit. Do not open the unit. In the event of malfunction, it must be returned to manufacturer for professional testing and repair. Opening the unit will void the manufacturer's warranty.ACCESSORIESRecommended accessories for use with this unit may be available from the manufacturer. If you need assistance regarding accessories, please contact manufacturer at 1-877-571-2391.WARNING: The use of any accessory not recommended for use with this appliance could be hazardous.SERVICE INFORMATIONWhether you need technical advice, repair, or genuine factory replacement parts, contact the manufacturer at 1-877-571-2391.FULL ONE-YEAR HOME USE WARRANTYThe manufacturer warrants this product against defects in materials and workmanship for a period of ONE (1) YEAR from the date of retail purchase by the original end-user purchaser ("Warranty Period").If there is a defect and a valid claim is received within the Warranty Period, the defective product can be replaced or repaired in the following ways: (1) Return the product to the manufacturer for repair or replacement at manufacturer's option. Proof of purchase may be required by manufacturer. (2) Return the product to the retailer where product was purchased for an exchange (provided that the store is a participating retailer). Returns to retailer should be made within the time period of the retailer's return policy for exchanges only (usually 30 to 90 days after the sale). Proof of purchase may be required. Please check with the retailer for their specific return policy regarding returns that are beyond the time set for exchanges. This warranty does not apply to accessories, bulbs, fuses and batteries; defects resulting from normal wear and tear, accidents; damages sustained during shipping; alterations; unauthorized use or repair; neglect, misuse, abuse; and failure to follow instructions for care and maintenance for the product.This warranty gives you, the original retail purchaser, specific legal rights and you may have other rights which vary from state to state or province to province. This product is not intended for commercial use. Please complete the Product Registration Card and return within 30 days from purchase of the product to: Baccus Global LLC, One City Centre, 1 North Federal Highway, Suite 200, Boca Raton, FL 33432. Baccus Global LLC, toll-free number: 1-877-571-2391.
